FROM: Tony Gallegos, Reclamation Engineer *adg*

RE: Site Inspection, Robert Clark, Miller Claims/Emeryside Mine, S/015/053, Emery County, Utah

Date of Inspection: July 27, 1995

Time of Inspection: 1020

Conditions: Warm, clear

Participants: Neil Simmons, BLM, San Rafael Resource Area; Tony Gallegos, DOGM

Purpose of Inspection: To become familiar with this operation.

This site is located near the Bret Clark site. The main portal is accessed by a road leading down from the north. The road wraps around the ridge as it goes down to the portal. At the time of this inspection, the portal is secured with a locked chainlink gate with brattice cloth covering it. The portal has a compressor line coming out from it which follows the road to a pad area with a compressor. The mobile compressor was covered with a blue tarp. What appears to be the ore pad is located adjacent to the compressor area. A small metal hopper is also located nearby.

Photographs were taken of the area. A pickup truck, camper and trailer are located at this site. A small debris pile is located near the pickup truck. Photographs of this site looking to the south (over ore pad, bags, hopper) also show the compressor at the Bret Clark site.
